

On Demand Migration: Hybrid Content Matrix

Quest®

Migrate on-prem SharePoint content directly into SharePoint Online.

Migrating content from on-premises SharePoint directly into SharePoint Online is challenging when you don't have remote access to the desktop where your Metalogix Content Matrix migration software is installed. On Demand Migration (ODM) Hybrid Content Matrix offers a single-pane-of-glass experience allowing you to remotely access to manage and control discovery and migration capabilities without having to directly access Content Matrix.

ODM Hybrid Content Matrix will automatically:

- Create a connection to the source, on-prem SharePoint server via Content Matrix.
- Create a connection to SharePoint Online via ODM.
- Run discovery of on-premises SharePoint content.
- Create migration tasks of SharePoint content to SharePoint Online.

Features

Automation

When you want an automated solution to manage the migration of your Power Automate Flows from tenant to tenant, ODM Hybrid Content Matrix will discover and identify potential issues, transform the flows and migrate them. Reporting on each of stage is provided.

Ease of Use

ODM Hybrid Content Matrix is easier to use compared to Metalogix Content Matrix product because customizations and configuration options are reduced to the most common or default settings.

Easy Configuration

ODM Hybrid Content Matrix provides the features to get the migration done using a familiar user interface. You can configure, run, monitor, and troubleshoot migrations all within the same ODM user interface used for your T2T migrations.

Simplified Licensing

Because ODM Hybrid Content Matrix acts as an add-on to the core Quest On Demand Migration, you can save significant costs by purchasing a one-year term license of ODM Hybrid Content Matrix with a one-year term license of Metalogix Content Matrix. Alternatively, you can purchase a one-year term license of ODM Hybrid Content Matrix and use it with an existing paid license of Content Matrix. A 30-day trial version is offered for free testing and evaluation. You'll have the ability to run a trial of ODM Hybrid Content Matrix with a trial or paid license of Metalogix Content Matrix.

Cost Reduction

Cost reductions by using ODM Hybrid Content Matrix are possible because it provides for common, repeatable processing by running Metalogix Content Matrix remotely.

Risk Reduction

You can also reduce the risk of unauthorized access by applying RBAC policies to ODM Hybrid Content Matrix. ODM users are given limited access to the applicable migration workloads. Using the proven Metalogix Content Matrix migration tool reduces the risk of migration issues.

Convenience/Usability

ODM Hybrid Content Matrix offers a single pane of glass experience for customers who want to migrate their on-premises SharePoint content to SharePoint Online.

About Quest

Quest creates software solutions that make the benefits of new technology real in an increasingly complex IT landscape. From database and systems management, to Active Directory and Microsoft 365 migration and management, and cybersecurity resilience, Quest helps customers solve their next IT challenge now.
