

Quest QoreStor – Now infused with Veeam Enhanced Data Mover

Faster backups. Smarter storage. Effortless integration.

Quest QoreStor is proud to be part of the Veeam Alliance Technical Program, a strategic collaboration that brings advanced capabilities to our solution, making it even more powerful and efficient for your data protection needs.

Through this program, Veeam's Enhanced Data Mover (EDM) technology is now infused directly into our QoreStor solution, optimizing how data is backed up and stored. Now you can transform backup workflows with blazing-fast performance, reduce network strain, and offer seamless compatibility, helping your organization save time, resources, and money.

What's in it for you?

1. Lightning-fast backup and restore times

Say goodbye to long backup windows. Veeam EDM embedded in QoreStor boosts data transfer speeds and ensures your backups are completed faster than ever, keeping your critical systems running smoothly.

Benefits:

- Gain 60% additional deduplication rate
- Immutable ransomware protection
- AI Anomaly Detection
- Intelligent Cloud Tiering
- Faster backup speeds
- Reduced network load
- Optimized Replication
- Simple integration with intuitive deployment

2. Security and ransomware resilience

QoreStor 7.5 seamlessly integrates with Veeam's EDM, as a hardened repository, adding protection with immutability.

Alongside key capabilities such as AI anomaly detection and encryption, your data is safeguarded against ransomware and other threats.

3. Optimized network resources

Why overload your network when you don't have to? This integration minimizes network traffic by processing data directly on QoreStor's platform, freeing up bandwidth for other essential tasks.

4. Smarter storage utilization

Maximize your storage investments with advanced deduplication and data reduction capabilities. QoreStor and Veeam EDM work together to help you store more data in less space without compromising performance, improving Veeam backup deduplication rates up to 60%.

5. Hassle-free integration

Deploy with confidence. Directly leveraging Veeam's repository workflow, simply add QoreStor as a Linux hardened repository. Seamlessly reducing deployment time and complexity.

Why choose QoreStor infused with Veeam EDM?

- **Reliability**—Ensure fast, consistent backups – every time
- **Scalability**—Control storage consumption for growing backup data volumes— add 60% more on top of Veeam deduplication
- **Security**—Gain key ransomware protection features such as immutability, AI anomaly detection and encryption

Your challenges, solved

Using QoreStor infused with Veeam EDM technology, you can count on backup processes that are faster, more efficient, secure and tailored to your needs.

Discover how we're pushing the boundaries of what's possible in data protection, so you can focus on what matters most: growing your business.

About Quest

Quest creates software solutions that make the benefits of new technology real in an increasingly complex IT landscape. From database and systems management, to Active Directory and Microsoft 365 migration and management, and cybersecurity resilience, Quest helps customers solve their next IT challenge now. Quest Software. Where next meets now.
